CHINEDUM SUNDAY

DATA ANALYST / ENGINEER

// ABOUT ME

An experienced Data Analyst / data engineer with a strong background in data analysis, data mining, and reporting. Skilled in developing and implementing data solutions to aid in decision-making, designing and implementing robust data infrastructure solutions, optimizing workflows, and ensuring data quality. Proficient in managing databases, warehouses, and lakes. Strong problem-solving and programming abilities.

// WORK EXPERIENCE

2023

Spotify Data Streaming and Analysis
link to project

Utilized Python and SQL to extract, transform, and analyze data for reports and dashboards.

Created and maintained dashboards, business intelligence reports, and scorecards to provide insights.

2022

Suicide Analysis Project
link to project

Conducted an in-depth data analysis using Tableau to explore the patterns and trends of suicide rates among different age groups. Gathered relevant suicide data from reliable sources and prepared it for analysis. Created interactive visualizations and dashboards in Tableau to effectively present the findings.

// CERTIFICATES

- **DIPLOMA :** DESKTOP PUBLISHING *2016*
- **CERTIFICATION: DATA ENGINEERING** *2023* (IN PROGRESS)

// ACADEMIC BACKGROUND

BACHELOR OF SCIENCE (STATISTICS)
UNIVERSITY OF NIGERIA NSUKKA
2019 - PRESENT

// MAIN HARD SKILLS

- Data analysis and interpretation
- SQL (Structured Query Language) proficiency
- Statistical analysis and modeling
- Data visualization tools (e.g., Tableau, Power BI)
- ETL (Extract, Transform, Load) processes
- Programming languages (e.g., Python, R)
- Database management systems (e.g., MySQL, PostgreSQL)
- Data warehousing concepts
